

## **“Family Physician”**

### **A Scientific Publication of PAFP (regd)**

PAFP (regd) is presenting this Scientific journal to its members. As you all know that our organization is working for the Promotion of education among the family physicians, this issue of “family physician” is a small representation of our work.

It includes high quality articles and for the first time in the history of Pakistan, PAFP (regd) is the only organization of family physicians which is presenting the Local Guidelines on Various diseases. Guidelines on the management of “Hepatitis C” in Primary Care settings is being published in this issue of “Family Physician”.

I being President of PAFP (Regd) once again express my determination that with the support of our members we will continue these activities by this educational body of family physicians.

**Dr. Tariq Mahmood Mian**

MBBS. MRCGP (Int)

President PAFP (regd)
